Disclaimers

This presentation material ("Presentation") is being furnished on a confidential basis to a limited number of sophisticated investors (the "Investor") for informational and discussion purposes only and does not constitute an offer to sell or a solicitation of an offer to purchase any security which are done by an offering memorandum or prospectus only. The information contained herein must be treated in a confidential manner and may not be reproduced, used or disclosed, in whole or in part, without the prior written consent of Quartus Capital Partners LLC or any of its affiliates (collectively "Quartus" or the "Firm"). Disclosure to persons other than the recipient and their representatives is prohibited. Furthermore, by taking receipt of this Presentation, the Investor agrees not to circumvent the Firm regarding any of the investment opportunities (the "Opportunities") discussed in the Presentation.

All investments involve risk. You may lose part or all of your investment. It does not account for specific investor objectives or circumstances or suggest a course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with their advisors. This Presentation is not tax advice; prospective investors should confer with a tax advisor for tax advice.

Past performance is not indicative of future results. There can be no assurance that any of the funds or Opportunities will achieve the targeted returns. Actual returns will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, legal and contractual restrictions on transfer that may limit liquidity, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained herein are based. Accordingly, the actual realized returns on unrealized investments may differ materially from the returns indicated herein.

Past fund performance information presented on pages 9 contains historical performance results of a past fund managed by the Firm. Quartus managed the investment from 2016 to 2021, and the performance results are based on the audited financial statements for years 2016-2021. This fund invested in debt securities of a large real estate project and thus no conclusion should be reached regarding the applicability of this fund's performance history to that of the strategy of the funds for investors to whom this presentation is provided.

Certain statements contained in this Presentation that are not historical facts are based on current expectations, estimates, projections, opinions and beliefs of the Firm. Projected future performance data, particularly on pages 9 and 25, is treated as forward looking. Such forward looking data reflect the current expectations, estimates, projections, opinions and beliefs of the Firm. Such forward looking statements are intended for investors who have access to the resources to independently analyze this data and who have the financial expertise to understand the risks and limitations of these types of statements. The Firm must provide information about the hypothetical data that is tailored to the audience receiving the Presentation, such that the intended audience has sufficient information to understand the criteria, assumptions, risks, and limitations. If such information is not contained herein, then such information is available promptly upon request.

Certain economic and market information contained herein has been obtained from published sources prepared by third parties and in certain cases has not been updated through the date hereof. While such sources are believed to be reliable, neither the Firm or its respective affiliates nor employees assume any responsibility for the accuracy or completeness of such information.

Neither the Firm nor any of its affiliates makes any representation or warranty, express or implied, with respect to the correctness, accuracy, reasonableness or completeness of any of the information contained herein, and they expressly disclaim any responsibility or liability. Additionally, depiction or description of the Opportunities are preliminary and are subject to change without any prior notice. The Firm does not have any responsibility to update any of the information provided in this Presentation.

Key Risk Factors

An investment in Quartus AI Fund II LP (the “Fund”), any of its feeder, alternative and parallel funds, or any of its affiliated SPVs involves substantial investment risks and the Interests should be purchased only by persons who can afford to sustain the loss of their entire investment and have no need for liquidity from such investment. In evaluating an investment in the Fund, prospective investors are urged to carefully consider the following risk factors relating to the business of the Fund together with the Risk Factors and other information set forth in Fund’s Memorandum before investing in the Interests:

No Assurance of Investment Return; Risk of Loss. An investment in the Fund is speculative and involves significant risk, including the possible loss of the entire amount invested. Fund cannot provide assurance that it will be able to identify, choose, make or realize investments of the type targeted for the Fund or that the Fund will be able to invest fully its committed capital. There can be no assurance that the Fund will be able to generate returns for investors or that returns will be commensurate with the risks of the investments within the Fund’s investment objectives. There can be no assurance that the Fund’s investment objectives will be achieved or that there will be any return of capital.

Performance Goals and Underwriting Standards. The targeted performance for Fund investments, and the underwriting standards utilized by Fund to evaluate prospective investments, are provided to assist potential investors and their advisers in evaluating an investment in the Fund. They are not a prediction or projection of actual investment results and there can be no assurance that any targeted return for an investment or, in the aggregate, for the Fund, will be achieved. Actual performance results may vary. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used in calculating any performance target or evaluating an investment’s compliance with Fund’s underwriting standards have been stated or fully considered. Further, such targets and standards may be adjusted by Fund in its discretion in light of available opportunities or changing market conditions.

Lack of Operating History. The Fund is new and the GP has limited operating history. The past performance of other investments or investment funds managed by any of Fund’s personnel cannot be relied upon as an indicator of the Fund’s success.

Long-Term Investments. It is generally expected that investments of the Fund will not be sold until a number of years after such investments are made, and the return of capital and the realization of gains, if any, from an investment in the Fund will generally occur only upon the partial or complete disposition of a portfolio investment.

Concentration Risk. The Fund may participate in a limited number of portfolio investments and, as a consequence, the aggregate return realized by the Fund may be substantially adversely affected by the unfavorable performance of any single portfolio investment. Further, the Fund is expected to concentrate its investments in a limited number of industries, and the performance of many of the Fund’s investments may be highly correlated. Adverse economic, regulatory or other developments in any of these industries may therefore substantially adversely affect the Fund’s performance.

Key Professionals. There can be no assurance that the investment professionals of Fund will remain at Fund throughout the life of the Fund. Loss of any key personnel could have a material adverse effect on the potential performance of the Fund.

Lack of Liquidity. The Fund is intended for long term investors who have the financial ability and willingness to accept the risks associated with making speculative and primarily illiquid investments. Interests in the Fund are not redeemable. An investor in the Fund may not freely transfer, assign or sell any interest without the prior consent of the GP. An investor may not, save in particular circumstances, withdraw from the Fund. Interests in the Fund will not be registered under the U.S. Securities Act of 1933, as amended, or any other securities laws in any jurisdiction. There is no liquid market for such interests and none is expected to develop.

Risks of Investments. The value of the securities of portfolio companies and the ability of such companies to pay their debts could be adversely affected by any number of factors, including the economic factors affecting a particular industry, changes in tax law or specific developments within such companies. In particular, the Fund is expected to make a number of its investment in companies that operate in industries that are highly regulated or could become highly regulated. Changes in relevant regulations in the United States and other jurisdictions may have adverse and unpredictable effects on the value of the Fund’s investments.

Leveraged Investments; Borrowing. The Fund will invest in companies that are expected to incur substantial debt to finance acquisitions, for capital expenditures or other expansions. Although the Fund will seek to monitor such leverage, the leveraged capital structure of such portfolio companies will increase their exposure to adverse economic factors such as rising interest rates, downturns in the economy or deterioration in the condition of a portfolio company or its industry. In the event that a portfolio company is unable to generate sufficient cash flow to meet principal and interest payments on its indebtedness, the value of the Fund’s equity investment in such portfolio company could be adversely affected. Subject to certain conditions, the Fund may also borrow money in connection with any investment. The Fund may enter into a credit facility, with borrowings expected to be secured by, among other things, the interests in the Fund’s commitments.

Potential Conflicts of Interest. Investors should be aware that there will be occasions when Fund and its officers and affiliates may encounter potential conflicts of interest in connection with the Fund. The GP’s carried interest may create an incentive to make riskier or more speculative investments on behalf of the Fund than would be the case in the absence of this arrangement. Members of the Fund team will work on other matters and, therefore, conflicts may arise in the allocation of management resources.

Taxation. Certain risks related to taxation is more fully discussed in the Fund’s definitive offering documentation, which prospective investors should read carefully. Prospective investors are urged to consult their own tax advisers with respect to their own tax situations and the effects of an investment in the Fund.

The foregoing risk factors do not purport to be a complete enumeration or explanation of the risks involved in an investment in the Fund. Prospective purchasers are urged to review Fund’s Memorandum in detail and consult their own advisors before deciding to invest in the Fund.

Executive Summary

v

Executive Summary

We have deep AI and technology expertise, active value creation and stewardship, and institutional-grade investment discipline to deliver strong risk-adjusted returns.

Deep AI & Technology Expertise

- AI and technology are deeply rooted in our management team's collective experience spanning 30+ years.
- Vertical AI is strategically positioned to benefit from the trillions of dollars being poured into foundational AI infrastructure.
- Vertical AI is solving critical, real-world problems across high-value sectors.
- We believe Vertical AI offers the best risk-adjusted return potential within the AI ecosystem.

Active Value Creation & Stewardship

- Our performance, operations and risk management experience is honed over 30+ years while working with some of the largest global institutions.
- Land and expand approach to build out positions in select companies that show strong performance.
- We seek board seats, consent rights and strong downside risk protections.
- Strong relationships with global investors, strategics and capital markets to diversify exit options.

Repeatable Investment Discipline

- We have established a consistent, data-driven framework that employs both qualitative and quantitative criteria for deal sourcing and investment selection.
- We have invested heavily in our repeatable investment processes and state-of-the-art technology infrastructure.
- Our funds are benchmarked by Cambridge Associates.
- Fund I has been in the top quartile for most of the past 2+ years¹.

1. Fund I is included in and benchmarked against the Cambridge Associates Benchmark Index for US venture capital funds from 2020 vintage.

Fund Performance & Projections

Past Fund¹ (2016-2021)

Quartus AI Fund LP^{2,3} (2020 vintage, as Dec 31, 2025)

KEY DEFINITIONS: Fund I = Quartus AI Fund LP; **Commitments** = total GP and LP commitments to the Fund; **Contributions** (same as **Called Capital**) = total GP and LP contributions to the Fund; **NAV** = net asset value of the Fund; **DPI** = Distribution to Paid-in Capital; **RVPI** = Residual Value to Paid-In Capital; **TVPI** = Total Value to Paid-In Capital = DPI + RVPI; **MOIC** = Multiple On Invested Capital; **Gross IRR** = Gross Internal Rate of Return before all fees, expenses and carried interest; **Net IRR** = Net Internal Rate of Return after all fees, expenses and carried interest; **Companies** = number of investments made by the Fund; **RTF** = Return the Fund.

1. Quartus managed a credit fund from 2016 to 2021 and the performance results are based on the audited financial statements covering years 2016-2021.

2. Projected for the full fund term ending in 2029 and based on portfolio investments' financial and operational data, cap tables, negotiated terms & conditions, growth and exit assumptions, projected follow-on rounds and projected exit scenarios.

3. MPORTANT DISCLOSURE: Please carefully review the Disclaimers on page 3, particularly about the fund projections and other forward-looking statements.

Firm Overview

Our Mission

Offer an AI and technology-focused venture growth equity strategy that delivers superior risk-adjusted returns while fostering collaborative investor relationships based on performance, trust and transparency.

Our Values Are Deeply Rooted In Our Global Experience

Relationship Oriented

We are committed
partners, not just investors

Resilient and Persistent

We embrace adversity
and challenge convention

Natural Problem Solvers

We have the flexibility and
creativity to overcome
obstacles

Globally – Minded

The world is one
interconnected market

Socially – Responsible

We believe in the ethos of
ESG and we strive to
invest mindfully

Our philosophy, values and expertise are the
intellectual property behind Quartus.

Quartus Multiplier Effect

Growth Engineering

Commercial Readiness Framework

We provide an analytical approach to understanding and assessing the commercial readiness of a company.

Operational Transformation

We make a holistic review of operations to assess areas for improvement and create a plan to accelerate growth and increase profitability.

Milestones-Based Execution

We actively engage with company management in devising and achieving performance milestones.

Global Connectivity

Fully-Engaged Global Team

Our global team, with deep personal and professional roots, applies their extensive experience across all facets of a business.

Market Access for Growth

We quickly identify and assess growth opportunities available for portfolio companies.

Strategic Value Creation

Through our extensive global network, we identify exclusive opportunities for strategic partnerships and possible exits.

Accelerated Exits

Global Capital Markets

We apply our financial capabilities and connectivity to a global network of capital markets to help produce accelerated and more profitable exits.

Diverse Strategic Investors

Likewise, our deep connectivity with global strategic investors can help diversify strategic exit options.

Investment Strategy

Quartus AI Investment Playbook

Vertical AI Solutions for High-Value Sectors are strategically positioned to benefit from the trillions of dollars being poured into AI infrastructure.

We believe, they provide the best risk adjusted return within the AI ecosystem.

Sources: Goldman Sachs' [Powering the AI Era](#) report and [Navigating the AI Era](#) report; relevant materials from other public sources; Quartus research and analysis

Quartus Multiplier Effect In Action

Key Target Metrics

- \$5M+ in ARR
- 50%+ YoY Revenue Growth
- High Gross Margin and Low Capital Expenditure
- Base Case 10x Exit Potential¹
- Liquidity Potential Within 5 Years
- Margin of Safety in Valuation and Liquidation Preference

FOR ILLUSTRATIVE PURPOSES ONLY
 1. For baseline exit scenario at underwriting, each portfolio investment should demonstrate on the average 10x or higher exit potential assuming company meeting or exceeding its pre-investment pro-forma financial projections, normal market conditions and estimated dilutions from follow-on investment rounds

Our Focus - Areas We Know Well

Areas where we have a “knowledge edge” based on our professional backgrounds, extensive global experience and access to global networks of experts. Opportunities that offer attractive long-term growth potential in the US, Europe and Asia.

Health Care

AI-based technology has the potential to revolutionize the healthcare industry by delivering new diagnostics and therapeutics solutions and improving overall patient care.

Education, Learning & Development

AI software can deliver adaptive learning, coaching and development for students and working professionals.

Financial Services

AI-based software can automate financial processes, fraud detection, risk assessment, credit scoring, investment analysis, and portfolio management, improving accuracy and efficiency in financial operations.

Cyber & Physical Security

AI-based cyber & physical security software can automate threat detection, risk assessment, and resolution management.

Logistics & Supply Chain

AI can optimize demand forecasting, inventory management and delivery logistics, leading to improved financial performance and customer satisfaction.

Sales & Marketing

AI-powered software can analyze customer data, predict buying patterns, recommend personalized marketing strategies, automate lead generation and qualification, and optimize sales processes.

Portfolio Diversification

Our target portfolio is diversified across non-correlated assets and designed to deliver strong risk-adjusted returns and return stability.

1. Sector Allocation here reflects an evolution of our investment strategy as stated in the PPM and LPA. FOR ILLUSTRATIVE PURPOSES ONLY; actual results may vary.

Investment Process

Select Exceptional Deals with “Quartus Fit”

A mutual fit is critical to our ability to dramatically improve and grow our portfolio companies. Quartus Fit includes both qualitative and quantitative criteria to identify and invest in exceptional technology companies.

1. For baseline exit scenario at underwriting, each portfolio investment should demonstrate on the average 10x or higher exit potential assuming company meeting or exceeding its pre-investment pro-forma financial projections, normal market conditions and typical dilutions from follow-on investment rounds

Actively Monitor & Fortify Portfolio To Achieve 4x Plus Target Fund Returns

Actively Monitor & Fortify Portfolio To Achieve 4x Plus Target Fund Returns

Land and Expand

- **Land:** small initial investments, allowing full access to information
- Seek board seat and consent rights on major decisions
- Evaluate portfolio company performance on an ongoing basis, utilizing information rights to select best performers
- **Expand:** building out positions in those portfolio companies that show strong performance by investing in follow-on rounds

Margin of Safety and Minimize Exposure in a Downside Scenario

- Focus on **growth stage companies** with **proven business models, significant growth potential** and **little technology risk**
- Invest at a discount to the next round of financing and/or participate in rounds where some downside protections exist
- Investing at a lower valuation than our VC/PE peers allows for a return of capital

Reserve Capital for Special Situations

- Reserve a part of the committed capital for special situations with the portfolio companies

Note: Quartus defines "Margin of Safety" as the difference between the current primary or secondary market value of a company and its true intrinsic value. Given that secondary markets are predicated on information and liquidity asymmetry, we seek to generate returns through both the value creation of a company and the difference between the price we pay for a security vs. its fair market value / intrinsic value.
