Important information

This presentation is provided on a confidential basis for discussion purposes only and does not constitute an offer or a solicitation. Certain information contained herein constitutes forward-looking statements, including targeted returns and projected deployment; such statements are based on assumptions and are not guarantees; actual results may differ materially. Past performance is not indicative of future results. An investment in the Fund involves a high degree of risk, including the loss of the entire investment, and is illiquid.

Strategy

- Our proprietary sourcing engine delivers superior returns through off-market transactions.
- Infrastructure assets attracted \$1.2 trillion of capital in 2025, and the mid-market remains fragmented.
- We focus on energy transition, digital infrastructure and transport with contracted or regulated cash flows.
- We believe disciplined entry valuations are the main driver of returns in the asset class.

Team
